New Training Opportunities

JAWS version 15 and Windows 8.1 have been released. We're excited to report that we installed JAWS 15 on a Windows 8 computer, and were able to use its "touch cursor" to explore the new Windows 8 apps. JAWS 15 appears to work as promised. In fact, we were able to use gestures on a Windows tablet. Along with the ability to support gestures, JAWS 15 offers other exciting new features.

We also have been able to successfully work with Microsoft Office 2013 and are offering training in the use of both Windows 8.1 and Office 2013.

For more information about training opportunities or if you have upgrade questions, please contact Spero Pipakis at 412-368-4400 ext. 3415.
